**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 26-44, drawn to a light source element comprising a waveguide covered with reflectors that at least one of reflect and diffusely return light.

Group II, claim(s) 45-50, drawn to a method of making a light source comprising a film that at least one of reflects and diffusely back-scatters light.

Group III, claim(s) 51 and 52, drawn to a method for introducing light into a light waveguide functioning as a light source element, comprising steps of covering with reflectors and forming a light entry face.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The light source as claimed does not require the film of the method as claimed. Therefore there is no unity of design or inventive concept between the method of Group II and the device of Group I since said device can be made entirely without said method.

The inventions listed as Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The light source as claimed does not require the step of forming of a light entry face of the method as claimed. (please note that the method of Group III entails the forming of

a light entry face on a light waveguide functioning as a light source element – which is virtually never done, since the light waveguide is already functioning). Therefore there is no unity of design or inventive concept between the method of Group III and the device of Group I since said device can be made (and used) entirely without said method.

The inventions listed as Groups II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The method of using a light source as claimed does not require the step of forming of a light entry face of the method as claimed. (please note that the method of Group III entails the forming of a light entry face on a light waveguide functioning as a light source element – which is virtually never done, since the light waveguide is already functioning). Therefore there is no unity of design or inventive concept between the method of Group III and the method of Group II since said method of Group II can be performed entirely without said method of Group III.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy L Rude whose telephone number is (571) 272-2301. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on (571) 272-2415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
